STATEMENT

Senior Software Engineer with +9 years of experience developing products and leading engineering teams. (My focus is on frontend and product, but I also have backend knowledge).

I taught myself to code at the age of 10, cloning video games because I was a kid, I didn't have money to buy them, and ever since, I've been passionate about creating things.

WORK EXPERIENCE

Senior Software Engineer • [Gohoken.com](#)

Jun 2022 → Present New York, New York (Remote)

- I've helped to build and launch the first version of the product, a hotel exchange where people can buy, sell, and TRADE their rooms for the most popular events around the world.
- I've helped to grow the engineering team, participating actively in the recruitment process of new employees.
- We've built our own design system and library of components using react, storybook, vanilla extract, and other technologies, to help the team create things as fast as possible and with the high quality as possible.
- Skills:** TypeScript · JavaScript · Python · NextJS · ReactJS · PostgreSQL · Jest · Storybook · Design Systems

Tech Lead • [Homie.mx](#)

1 Year of experience Mexico City, Mexico (Remote)

- I participated in guiding, mentoring, and leading a group of devs (10) to the company goals!
- I was part of the team in charge of reviewing the quality of the products of the company that were developed and designed by 3rd companies like software factories. Reviewing the code, good practices, scalability, and other considerations.
- I was in charge of the development of our design system and our components library that was deployed to NPM, taking decisions on the stack we were using, architecture, and the way the components were working.
- Skills:** Storybook · TypeScript · JavaScript · NextJS · ReactJS · Strapi · Design Systems · Chromatic · Jest · Cypress

Lead Frontend && FullStack Developer • [Recaudia](#)

3 Years of experience Mexico City, Mexico (Remote)

- I was in charge of everything related to the Frontend things in the company, and I was in charge of redistributing the tasks among the persons in my team, according to their knowledge and level of experience.
- I participated in guiding, mentoring, and leading a small group of devs (3) to the company goals!
- I was in charge of helping the team to create quotes for the clients, depending on the hours of development a project was going to take.
- In addition to leading the frontend team, sometimes I was part of projects with backend implications like developing an API, updating some parts of the code, or maintenance of legacy code.
- Also sometimes I was part of the decisions about the infrastructure we had, like AWS or Google Cloud.
- Skills:** TypeScript · JavaScript · Angular · NodeJS · Google Cloud · PostgreSQL · Jasmine

Tech Lead • [Wellhouse](#)

2 Years of experience Mexico City, Mexico (Remote)

- I participated in building the first versions of the product from an MVP stage to more sophisticated software, we were a company that measured the productivity and the wellness of the employees, using data and a dashboards.
- I was in charge of deciding on the architecture, stack, and how to create a fast MVP to launch to the market.
- I was in charge of growing the team, hiring the first employees of the team, doing a recruitment process I participated in the sales process of the company,
- I used to go to meetings with clients, and talk with the technical team of our clients for the integrations they could require.
- Skills:** JavaScript · Python · NextJS · ReactJS · Angular · PostgreSQL · TypeScript · Firebase

Frontend Engineer • [Umvel.com](#)

2 Years of experience Mexico City, Mexico (On-site)

- My team was in charge of creating the marketing sites and apps as fast as we could for some big brands such as: Netflix, Samsung, Volkswagen, Yves Rocher
- I helped defining the architecture and the stack of the sites/apps
- I used to take meetings and presentation with the client to take requirements and changes
- I used to coach some JR engineers of the team to help them grow.
- Skills:** JavaScript · Ionic · Cordova · Angular · AngularJS · NodeJS · Mocha · Wordpress
